DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2 and 4-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bommart (U.S. 5,151,202) in view Song (U.S. 4,358,908). Bommart teaches a cover 85 for closing a top opening of a thermite reaction chamber of a crucible 11. The cover 85 has a bottom peripheral edge at 91 which seals against top peripheral edge 44 of the crucible. The material of the cover is disclosed as being agglomerated sand (see col. 15 lines 49-61). The downwardly extending peripheral rim of the cover is shown at lead line 89. The centering means is considered to be the outer wall of the downwardly extending peripheral rim of the cover.

Bommart does not teach the filter lining at the bottom edge of the cover, instead Bommart teaches venting through a separate venting aperture at 97. However, it is well known to provide the venting of a container at the closure/closure support junction. Song teaches that it is known to provide a filter at the closure/closure support junction to allow for venting (see element 39). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the cover of Bommart replacing the venting aperture 97, with the venting and filter at the closure/closure support junction, in order to simplify the shape of the cover, so that it is easier to manufacture.

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bommart (U.S. 5,151,202) in view Song (U.S. 4,358,908), as applied to claim 2 above, and further in view of Hargraves et al. (U.S. 4,966,780). The modified cover of Bommart discloses the claimed invention except for the filter lining

being made of synthetic fibers. Hargraves et al. teach that it is known to provide a filter of synthetic fibers. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified cover of Bommart with the filter lining being made of synthetic fibers, in order to easily manufacture the filter lining using a well known, durable materials.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the cover structure.

5. THIS ACTION IS NON-FINAL.
